

# Safe storage of medical cannabis

Storing medical cannabis safely at home helps prevent it from being used by children and other people by mistake.

Medical cannabis in pharmacy packaging

Use the pharmacy's child-resistant packaging even after taking it home.

Make sure you can always see the original label and warning logos on the package.

Store it out of kids' sight and reach, especially if it looks like candy.

Use child-proof containers for storage.

Treat medical cannabis like any other medicine.

Put it away after every use.

Do not use it around kids.

Be prepared. Save the Utah Poison Control hotline (1-800-222-1222) in your phone in case of an emergency.
